Pune

Results-driven and highly skilled RPA (Robotic Process Automation) Developer with over 9 years of proven track record in designing, developing, and implementing solutions to streamline business processes.

Education

Bachelor's in Technology
Poornima College of
Engineering, Jaipur

Core Competencies

Requirement Analysis

Credential Management

Business Process

Robotic Automation Process

Workflow Automation

Agile Methodologies

Scripting

Continuous Improvement

Team Leadership & Management

Skill Set

UiPath

JIRA

Rally

Designing the Workflow

Orchestrator Management

Production Deployment

Certification

RPA-UiPath Associate Certified.

Profile Summary

- Possess knowledge of emerging trends in **RPA and continuously improving automation solutions** to optimize workflow and enhance overall business performance.
- Skilled in crafting workflows, conducting requirement analysis, and selecting bot designs, as well as managing orchestrator deployment.
- Showcased excellence in **establishing governance frameworks** to manage risks and maintain compliance throughout the automation lifecycle.
- Skilled in **selecting appropriate RPA tools and technologies**, defining automation workflows, and designing bot architectures.
- Proficient in leveraging **UiPath-RPA Associatev1, Orchestrator, Queues, RE-Framework, and Excel, UI, and SAP automation** to drive process optimization and operational efficiency, with a strong focus on quality delivery and collaborative teamwork.
- Adept at **collaborating with cross-functional teams** to identify automation opportunities, gather requirements, and deliver high-quality, scalable solutions that align with business objectives.
- Expertise in monitoring the performance of deployed **RPA solutions** and identify opportunities for optimization and enhancement and maintained documentation of RPA processes, configurations, and best practices.
- Outstanding proficiency in conducting thorough testing of **RPA bots** to ensure they operate accurately and reliably in various scenarios.
- Proficiency in conducting thorough testing of RPA solutions to **ensure accuracy, reliability, and scalability**.

Career Timeline

2014-21

2021-22

Since 2022

Work Experience

Sept'22 - April'24 | Wipro | RPA Consultant

Key Result Areas:

- Assessment and Analysis:** Evaluating clients' business processes to identify opportunities for automation using RPA technologies.
- Solution Design:** Designing RPA solutions tailored to the specific needs and objectives of clients.
- Development and Configuration:** Developing RPA bots or scripts using RPA software platforms like UiPath.
- Implementation and Deployment:** Overseeing the deployment of RPA solutions into production environments
- Training and Knowledge Transfer:** Providing training and support to client teams on using RPA tools and managing automated processes.
- Continuous Improvement:** Monitoring the performance of deployed RPA solutions and identify opportunities for optimization and enhancement.
- Compliance and Governance:** Ensuring that RPA implementations comply with relevant regulations, industry standards, and security policies.
- Stakeholder Management:** Collaborating closely with clients, project managers, business analysts, and other stakeholders to align RPA initiatives with organizational goals and priorities.

Achievements

Received Insta Award
at Unit level in Infosys

Won Champion Award
in Infosys

Sept'21 – Sept'22 | Nihilent, Pune | RPA Developer

Key Result Areas:

- Leading RPA development initiatives, utilizing expertise in UiPath and automation tools to optimize processes and drive operational efficiency.
- Created and configured automated processes that meet business goals and objectives.
- Offered support during the deployment phase and ensure smooth transition to automated processes.
- Introduced accessibility testing and utilize story management tools like Rally to optimize testing processes.

Dec'14 – Aug'21 | Infosys, Pune | TA

Key Result Areas:

- Played a pivotal role in driving the automation of complex processes, resulting in a significant increase in productivity and operational efficiency within the banking domain.
- Demonstrated proficiency in UiPath-RPA Associatev1, Orchestrator, Queues, and RE-Framework, driving the automation of complex processes and enhancing productivity.
- Conducted comprehensive testing, including smoke testing, regression testing, and system integration testing, ensuring the delivery of high-quality software solutions.
- Leveraged Regression Testing, Manual Testing, Unit Testing and Accessibility Testing.
- Facilitated seamless communication and collaboration, resolving complex software issues and fostering a culture of continuous improvement and innovation.
- Led and organized engaging team bonding activities, fostering a positive and collaborative work environment, contributing to enhanced team morale and productivity.

Technical Skills

- **Tools:** UiPath, JIRA and Rally
- **Databases:** Oracle, MS SQL Server 2010
- **Testing Concepts:** RPA Bots Testing, STLC, Defect Life Cycle, Testing Types and Test Management
- **Domain:** Banking and Healthcare
- **Story Management Tools:** Rally

Personal Details

ANNEXURE – PROJECTS

Project Title: User Management

Development Tool: Uipath Studio

Roles and Responsibilities:

- Independent responsibility of end-to-end delivery of the Process.
- Involved in the daily scrum call and review meetings.
- Understanding the Process Flow by interacting with Operators and Client.
- Step by Step Analysis to determine % Feasibility of Automation.
- Prepare Solution Design Document.
- Perform Unit Testing, Integration Testing and assist through UAT.

BOT: User Management Bot

Description: Verified the user's presence and if absent, create the user and managed their access via mainstream methods.

Project Title: FSS Reporting

Company: Nihilent

Development Tool: Uipath Studio

Roles and Responsibilities:

- Independent responsibility of end-to-end delivery of the Process.
- Involved in the daily scrum call and review meetings.
- Understanding the Process Flow by interacting with Operators and Client.
- Step by Step Analysis to determine % Feasibility of Automation.
- Prepare Solution Design Document.
- Perform Unit Testing, Integration Testing and assist through UAT.

BOT: FSS Report Generation

Description: Process involves creating a report for all processes.

Scope of Automation: Involved automation of end to end process with input data upload into shared drive in Excel by management team. Bot responsible for picking the files, processing data of all processes details which runs on daily basis and trigger final report via mail to respective team

Project Title: MNET

Company: Nihilent

Development Tool: UiPath Studio

Roles and Responsibilities:

- Independent responsibility of end to end delivery of the Process.
- Involved in the daily scrum call and review meetings.
- Understanding the Process Flow by interacting with Operators and Client.
- Step by Step Analysis to determine % Feasibility of Automation.
- Prepare Solution Design Document.
- Perform Unit Testing, Integration Testing and assist through UAT.

BOT: MNET Trigger

Description: Process involves creating a consolidated report for input files.

Scope of Automation: Involved automation of end to end process with input sent via mail. Bot responsible for triggering the process as soon as file received and transferring them to respective input folders. Processing data of all channels in the required format and trigger consolidated report via mail to respective team

Project Title: Consumer Lending

Company: Infosys

Client: Infosys

Duration: From 2018 till date

Development Tool: UiPath Studio

Roles and Responsibilities:

- Independent responsibility of end to end delivery of the Process.
- Involved in the daily scrum call and review meetings.
- Understanding the Process Flow by interacting with Operators and Client.
- Step by Step Analysis to determine % Feasibility of Automation.
- Prepare Solution Design Document.
- Develop Modules in UiPath for Process automation.
- Perform Unit Testing, Integration Testing and assist through UAT.

BOT: New Appointments

Description: Process involves updating new join's data.

Scope of Automation: Involved automation of end to end process with input data upload into database in Excel by management team. Bot responsible for picking the files, processing and sending the filtered data of new join's in the final Excel report to the respective team.

BOT: Financials

Description: Process involves updating financial details of various clients. S

- Scope of Automation: Involved automation of end to end process with input data upload into shared path in Pdf files by management team of respective clients. Bot responsible for picking the files, processing and sending the financial report for various clients to the respective team to get updated in the app.

BOT: Relationship Data

Description: Process involves updating relationship of clients details with the organization.

- Scope of Automation: Involved automation of end to end process with input data upload into database in Excel by management team. Bot responsible for picking the files, processing and sending the final strong clients details of organization in Excel report to the respective team.
