-

Technical Skills

- **Languages:** Python
 - **Database:** SQL
 - **RPA Tools :** UiPath, Callista
 - **Tools:** Power BI, MS-Office, Putty, WinSCP, Microsoft Office, MyAccess, GARS, LoanIQ, CAPAM
 - **Operating System:** Windows
-

Personal Project

Speaker Identification

- A speech utterance from an unknown speaker is analyzed and compared with speech models of known speakers.
 - The unknown speaker is then identified as the speaker whose model best matches with the input utterance regardless of the text and in which language it's been uttered.
-
