UiPath™ Gowthaman Subramani

Tech Lead

PROFILE SUMMARY

- Possess extensive experience in the analysis, development, administration, and implementation of large-scale Robotic Process Automation (RPA) projects.
- Currently leading end-to-end implementation of the Valuation Connect project at AppsTek Corp, including maintaining 30 processes in production, managing new requirements, and implementing software and hardware upgrades
- Proficient in leading and managing teams, with a strong focus on driving operational efficiency and strategic solutions to achieve business growth.
- Acknowledged for driving business growth through the implementation of ROI and Bot Utilization Dashboards, enhancing operational efficiency, and offering strategic solutions at AppsTek Corp.
- Experienced in robot configuration, package uploading in Orchestrator, asset and credential management, deploying packages to different BOTS, and work queue creation and management through BOT.
- Excellent in leading end-to-end implementation of RPA projects, conducting feasibility checks, and providing solutions, leveraging expertise in UiPath, Automation Anywhere, Microsoft Power Automate, and SAP iRPA, and in-depth knowledge of, BPM, WAS admin, and UNIX.
- Skilled in RPA, solution architecture, and project management, with expertise in UiPath, Python, VB, .Net, and Macros.
- Exceptional interpersonal and communication skills, fostering effective collaboration and seamless stakeholder management in complex business process environments.

CAREER TIMELINE

PROJECTS UNDERTAKEN

AppsTek Corp | Jun'23 - Present
Senior Developer/Tech Lead

AppstTek CORP

Project	: Valuation Connect
Customer	: Mortgage Connect
Solution Environment	: Production
Tools	: UiPath, Python, VB, .net, Macros

- Conducting feasibility assessments, performed code reviews, and offering solutions to the team.
- Supervising end-to-end management of 30 RPA processes, leading their entire lifecycle from development to production, showcasing strong leadership in development, maintenance, and enhancement.
- Managing the maintenance of 25 bots in production and supervising a team of 5 in both development and support roles.
- Pioneering the development of new RPA processes, actively engaging with clients to gather requirements and deliver efficient automation solutions.
- Maintaining documentation practices, ensuring accuracy and accessibility of client-provided documents for streamlined processes.

Highlights:

- Implemented Power BI dashboards for insightful ROI analysis and license utilization, enhancing decision-making capabilities for both leadership and operational teams.
- Directed a successful migration initiative, upgrading RPA tools from version 2020.10.2 to 2022.10.2 and UiPath Studio migration from 2020.10.2 to 2022.

CERTIFICATIONS

UiPath Advanced Developer Certification - 2019

UiPath Orchestrator 2018.4 Training - 2018

UiPath Uipath Studio Foundation Training - 2017

Advanced Power BI Certification | 2023

Automation Anywhere Advanced RPA Professional certification - 2019

IBM WAS WebSphere Application Server Network Deployment v7.0 - 2014

AWARDS

Received the "On the Spot Award" recognition of outstanding contribution | Sep'16

Recognized as the Best Team for exceptional teamwork. | Jan'17

PERSONAL DETAILS

DOB: 4th July 1989

Languages Known: English, Tamil

Passport Number: L4005686, Valid till 3rd September 2023

Marital Status: Married

No. of Dependents: 3

Address: Bangalore

Gyan Sys | Aug'20 -Mar'23 Senior Developer/Tech Lead

GYANSYS

Project : Citrix
Customer : Citrix
Solution Environment : Production
Tools : UiPath, Python,VB,.net,Macros

- Led the development and implementation of automation processes for SAP and Salesforce applications.
- Executed the successful implementation and maintenance of 14 to 15 processes in production, ensuring adherence to client requirements.
- Created and deployed scripts for critical functions such as workbook generation, order creation, and order cancellation as an individual contributor.
- Managed and led a support team of 4-5, ensuring timely issue resolution and maintaining high client satisfaction.
- Provided effective solutions to other teams in a solution architect capacity, contributing to overall project success through optimal design and functionality.

Wipro | Oct'19 - Jul'20 UiPath Admin/Tech Lead

Project : LinkedIn
Customer : LinkedIn
Solution Environment : Production
Tool : UiPath

- Deployed codes in Orchestrator involves monitoring bots, granted user access and roles, and resolved critical server issues.
- Updated UiPath with patches for optimal performance is part of the role, along with maintaining project documents using version control on SharePoint.
- Managed credential resets for user profiles as well.

PREVIOUS EXPERIENCE

- Genpact | Senior RPA Developer/Solution Architect | Jul'18 - Oct'19
- TCS | Senior RPA Developer | Jun'12 - Jul'18

TECHNICAL SKILLS

Proficient in Windows 7, XP, and Windows 10, along with Unix and .Net, VB, and C# programming languages.

Skilled in Shell and Macros scripting languages, with expertise in HTML, XML, IBM Process Designer, IBM Process Centre, and IBM Process Admin.

Experienced in MS-SQL Server 2008, IBM BPM, WAS, Windows Azure, UI Path Studio, Automation Anywhere, Microsoft Power Automate, and SAP iRPA.

ANNEXURE FOR PROJECT DETAILS

Genpact

Project : GE Power_Gas Optimization Power_DPR & DD
Customer : General Electric(Power)
Period : Sep 2018 – Oct 2019
Role : Senior RPA Developer/Solution Architect
Solution Environment : Production
Tool : UiPath

- Managed gas turbine repair services for GE Power, supporting customer fulfillment leaders by supervising repairs through MIS reports, ensuring timely delivery.
- Implemented RPA to enhance productivity and process efficiency, automating daily reports using UiPath.
- Generated daily reports from various ERPs such as Tableau, Support Central, SAP, and email inputs.
- Integrated inputs into a single macro for streamlined DPR and DD output.

TCS

Project : TSE
Customer : Tata steel Europe (Netherlands)
Period : Jul 2017 – Jul 2018
Role : Senior RPA Developer
Solution Environment : Production
Tool : UiPath

- Automated Citrix-based invoicing processes in Acu-Thin using UiPath.
- Executed price corrections in Mainframe application through UiPath automation.
- Conducted data extraction from various SAP transactions (ZS06, ZS33, and ZR01) as part of the SAP Automation process.

Project : AVIS Budget Group
Customer : AVIS Budget Group
Period : May 2017 –Jun 2017
Role : RPA Developer
Solution Environment : Production
Tool : UiPath

- Automated the ticket assigning process using UiPath, revolutionizing web automation for client site login and ticket management.
- Implemented dynamic checks for new tickets, analyzed priorities, descriptions, and summaries, categorized tickets based on set criteria, and assigned them to resources.
- Enhanced communication by notifying resources through Mail/Lync, adapting to their availability for prompt response.

Project : Claim submission
Customer : Internal
Period : Mar 2017 – Apr 2017
Role : RPA Developer
Solution Environment : Production
Tool : UiPath

- Automated data transfer from the Source/Host system (Web/GUI-based application) to the Target/Destination system using UiPath.
- Initiated web automation to access the client's mail, extracting credentials from subject or body items for login to an internal website.
- Navigated through specific pages, extracted targeted data, and compiled it into an Excel sheet.
- Utilized these values as inputs for a new claim page, streamlining the entire process.

Project	: SWIFT BUS
Customer	: JPMorgan Chase &co
Period	: Dec 2015 – Feb 2017
Project	: Commercial Lending Redesign (CLR)
Customer	: BMO(Bank of Montreal)
Period	: Oct 2012 – Oct 2015
Role	: WAS Admin
Tool	: IBM WAS ,IBM BPM, ,Unix, WinScp

- Deployed applications on clusters, updated installed applications, and configured Web Server plug-ins using both the administrative console and command line.
- Executed the deployment of SQL queries and site content (WAR/EAR/JAR) through Putty on application servers, adjusting file permissions and creating user credentials.
- Managed user authorization and authentication for IBM BPM 8.5.5, monitoring process execution, and conducting fundamental performance tuning.
