Profile

An RPA Developer with excellent statistical and analytical skills. I process the knowledge to identify nuances and recover from misshapes if any. Worked on tools like UiPath. Able to adapt to new environments quickly and communicate the best practices.

Experience

○ Fujitsu Consulting India Pvt. Ltd., Pune

January 2022 – April 2023

RPA Developer

- Created a system that monitored and tracked process exceptions and reported them in real-time, allowing for faster resolution and improved customer service.
- Developed an artificial intelligence-driven RPA system that reduced the need for manual intervention.
- Developed a system that monitored for process anomalies and alerted stakeholders in real time, allowing for faster resolution of issues.

○ Efovinity, IT Consulting Services Private Limited

April 2023 – Present

RPA Developer

- Design processes according to the operational needs of an organization.
- Configure automation systems using optimal combination of RPA tools.
- Deploy various RPA components, including bots, robots, and development tools.
- Design, develop, and test automation workflows and Deploy robot using Excel automation.

Projects

○ ServiceNow Automation (Incident Management)

- ServiceNow involves setting up systems to define, manage, automate and structure services for companies. We made Robot to manage Incident without human interaction. Create Bots to create incident, Get incident and Update incident using Web API packages.
- **Tools** - UiPath, ServiceNow, Excel

○ SAP Automation (Job Tracking)

- SAP Automation enables business users to automate workflow processes and tasks without writing code. I deploy many SAP Process like Canceled job, Active and Ready state job table with timestamp and store into excel file with proper structure.
- **Tools** - UiPath Studio, SAP, ServiceNow, Excel

○ Healthcare Integration

- Ensure that Epic can seamlessly exchange data with existing systems such as Electronic Health Records lab systems, and billing systems we need to Automate all the system. Implement standardized data formats and protocols to facilitate smooth data exchange between Epic and other systems.
- **Tools** - UiPath, EPIC System, Excel
