Experience

MAGIC SOFTWARE | Associate Software Engineer   **July 2022 - Present**

1-Sales Order Workflow
- **Technologies used:** SAP Build Apps, SAP Build Process Automation, SAP Build Work Zone.
- **Description:** Sales order Workflow comprises of a sales order that confirms a sale that is generated by the seller after receiving a purchase order from the buyer. To guarantee that sales orders are delivered on time, these sale order requests must be verified and approved by the supplier. The requester will be notified once it has been approved or rejected.

2-Time To Travel Application
- **Technologies used:** SAP Build Apps , SAP Build Process Automation.
- **Description:** Time to Travel Application provides a seamless experience to the traveller information about destinations all around the globe. Other features that app includes are calendar event markups, weather updates, and currency conversion. It uses Backend REST API that is along with integration with ChatGPT to answer user queries.
