Career Objective

Looking for an opportunity in Robotics Process Automation. Having good exposure and hands on experience in RPA technologies will be an asset to the organization. Dedicated Individual focused on achieving objectives of the organization thereby enhancing my knowledge as well.

Work Experience

- Working as an RPA Developer (L5) for **Claysys Technologies** from June 2021 to till date
- Worked as Software Analyst for **GIDEON GARDEN Technology**, from June 2020 to June 2021.

Key Competencies

- Having **3+ years** of proven experience in developing Enterprise Automation Process using **UiPath** and Claysys Internal tool (RPA - Genie) similar to framework based on Uipath.
- Reporting Risks and Issues throughout the Project lifecycle to respective project manager
- Design, Code, Testing Automation and Document.

Technical Skills

- **Languages:** C, C++, HTML, SQL, VBScript
- **RPA Tools: UI Path, Claysys Internal Tool (Similar to UI Path)**
- **Application Tools: Word Press, SitePad.**

Project Profiles

Project 1: Consumer Servicing Document Request

Client: US Based Client

Project Role: (RPA Developer L5)

Description:

- This project involves DNA Application, Web Automation. Fetching the Transaction data from Database, based on the document type need to download exact document in PDF Format and verify it for the Data in it, Generating document and Sending it to the customers in the requested mode via Mail,Email,Fax.

Key Tasks and Areas of responsibilities for Enhancements Projects:

- Using REFramework Template and Following RPA Standards and configuration guidelines throughout the Development. Fetching Data from SQL and Adding to Orchestrator Queue for Processing Data, Creating Assets for storing all values, Using trigger to Run Process.
- Coordinate with Testing / Quality Engineering teams to ensure proper testing is performed.

Project 2: Debit Card limit Decrease

Client: US Based Banking Client

Project Role: (RPA Developer L4)

Description:

The project is intended to Reduce the limit of Debit for few users based on scenario. Fetching the input

data from excel sheet and processing it and updating the status in that sheet.

Key Tasks and Areas of responsibilities Included:

- Designing business Process and Business Requirement Gathering, using Queue Concepts, Assets and Time Trigger Based Automation
- Unit Testing, releasing to Quality Assurance and Updating the Daily status to client
- Monitoring automated workflows to ensure that business process function at optimum efficiency without risk of error.
- Ensure timely completion of assigned tasks as per the Project Plan.

Project 3: Dealer Dashboard

Client: US Based Banking Client

Project Role: (RPA Developer L3)

Description:
The Aim of this Project is to Fetch Dealer's Document and uploading it to a website.

Key Tasks and Areas of responsibilities Included:

- Design and Implementing Process Flow, code, test, and document. Sending mail alerts through orchestrator for job started, completed, Robot connected and disconnected
- Monitoring the Process using Orchestrator, Debugging, Managing Robots and checking the Queue (Transaction) status.

Project 4: Business Member On-Boarding

Client: US Based Banking Client

Project Role: (RPA Developer L4)

Description:

Key Feature of this Process is to Automate Onboarding for a business member.

- This project involves totally four processes, first process is Extracting the Details from Client site and adding those member details to the Queue. Second Process is BOT Enters into a Website, prints the document, and uploads it into Nautilus Application. Third process is to Generate Documents and sending it to client for getting Acknowledgement using an API call. Fourth Process is to Upload those signed documents to Nautilus application.

Key Tasks and Areas of responsibilities for Enhancements Projects:

- Adding Queue Concepts for Processing Data, Creating Assets for storing all values, Using Queue Based trigger to Run the UI Process, Extract Data Table.
- Implemented Exception handling Methodologies, checks and balances, logging, Exception mail Alerts, Retry Mechanism and etc.,
- Highlight Risk and Issues throughout the project life cycle to respective Project Manager. worked on GitHub, making changes to the code and pushing to origin, creating pull request, committing the changes to main and etc.,

Project 5: Enhancements on GL Process

Client: US Based Banking Client

Project Role: (RPA Developer L3)

Description:
The Main Goal of this Enhancement is to Avoid Existing Exceptions in Process which are running in Production.

- Following Queue Concepts and Adding Assets values, Checks and Balance, Exception handling based on Business Requirement, Using MS Office (Excel) for Updating Status, Sending an Exception mail with Exception message, and following the RPA Standards.

Certifications

- Completed RPA developer advanced certificate on "UiPath".
- Diploma of completion on orchestrator, triggers and monitoring.
- Diploma of completion on Robotic Enterprise Framework.
- Diploma of completion on Error and Exception handling.

Education Summary

- B.E – Electronics & Communication Eng. in Dr. Sivanthi Aditanar College of Engineering, Tiruchendur, TN,India.
