Professional Experience

- Experience in building RPA (Robotics Process Automation) solutions using **UiPath**.
- Expert in implementing the features like **Recordings** in Uipath.
- Experience in **Orchestrator attended robots** and **unattended robots.**
- Developed robotic bots using **RE framework**.
- Design well experience with **RE-framework, Sequence**, **Flowchart** and **State Machine**.
- Experience in **OCR.**
- Experience on development of Knowledge Based Applications (Automation) with Microsoft Excel, Outlook, and PDF Automation, SQL activities, web automation.
- Good understanding and different applications like **Web, Windows, Exce**l.
- A working knowledge **Queues & active Queues.**
- Being good at **troubleshooting and debugging** is desirable.
- Used different UiPath automation techniques to automate complex processes. E.g. **Scrapping**, **Recordings, Ui-Explorer, Selectors, Object repository**, **publishing** and **provisioning** etc. .
- Have in-depth knowledge and worked with **100 plus activities** offered by UiPath.
- Handle the exception using **Try-Catch activity, throw & Rethrow.**
- Having knowledge of **SQL**.
- Working experience with **Jira tools.**
- A familiarity with the different methodologies available, such as **Agile and Waterfall** models.
- I am well versed in the **RPA Life Cycle, the SDLC (Software Development Life Cycle) and the STLC (Software Testing Life Cycle).**
- Having good knowledge of **PDD and SDD.**
- Good at communicating and presenting my ideals to Clients\Team members and have great zeal to learn new technologies and take up new challenges.
- Excellent communication and collaboration skills to make sure things are done till finish line.

Projects

Project 01

- **Project Name** :- FinSafe
- **Domain :-** Banking Domain And Finance
- **Role :-** RPA Developer

- **ROLES AND RESPONSIBILITIES :-**

1. Developed Business process flow as per the requirement.
2. Assist and support implementation team members.
3. Project phase includes the RPA features like Queue and Exception Handling Concepts.
4. Understanding Logical flow of the Application from Business Knowledge.
5. Developing application logic and run the flow of application.
6. Involved in unit testing process in the development environment.
7. Involved in Full Software Development Life Cycle (SDLC).
8. Involved in process walk through and feasibility checking.
9. Deploying set up files on client environment, support and bug fixing.
10. Provided the estimation for Development and testing of process.
11. Perform unit tests and fix bugs.

Project 02

- **Project Name** :- TransactEase
- **Domain :-** Banking Domain
- **Role :-** RPA Developer

- **ROLES AND RESPONSIBILITIES :-**

1. Automated Web application using RPA.
2. Developed Business process flow as per the requirement.
3. Using the Work queues concept developed the Process in such a way that
4. Process can process multiple applications parallelly using multiple queues.
5. Understanding Logical flow of the Application from BusinessKnowledge.
6. Worked with Production support during UAT and Production Installs.

Project 03

- **Project Name** :- US MediTrack
- **Domain :**- Health Care
- **Role :-** RPA Developer

- **ROLES AND RESPONSIBILITIES :-**

1. Involved in requirement calls and process design sessions.
2. Creation of PDI & SDD documents and End to End process. testing.
3. Created objects and process based on the SDD document.
4. Release Management and Production Support.
